

Delivering another Resorts World Casino — and this time in New York City, home to NYC's only casino.

CADLUME helped bring the space to life with lighting that sets the tone and elevates the entire experience.

Working alongside with Chroma Lighting Group and HKA5 Architecture, we shaped an atmosphere that's stylish, welcoming, and unmistakably Resorts World.

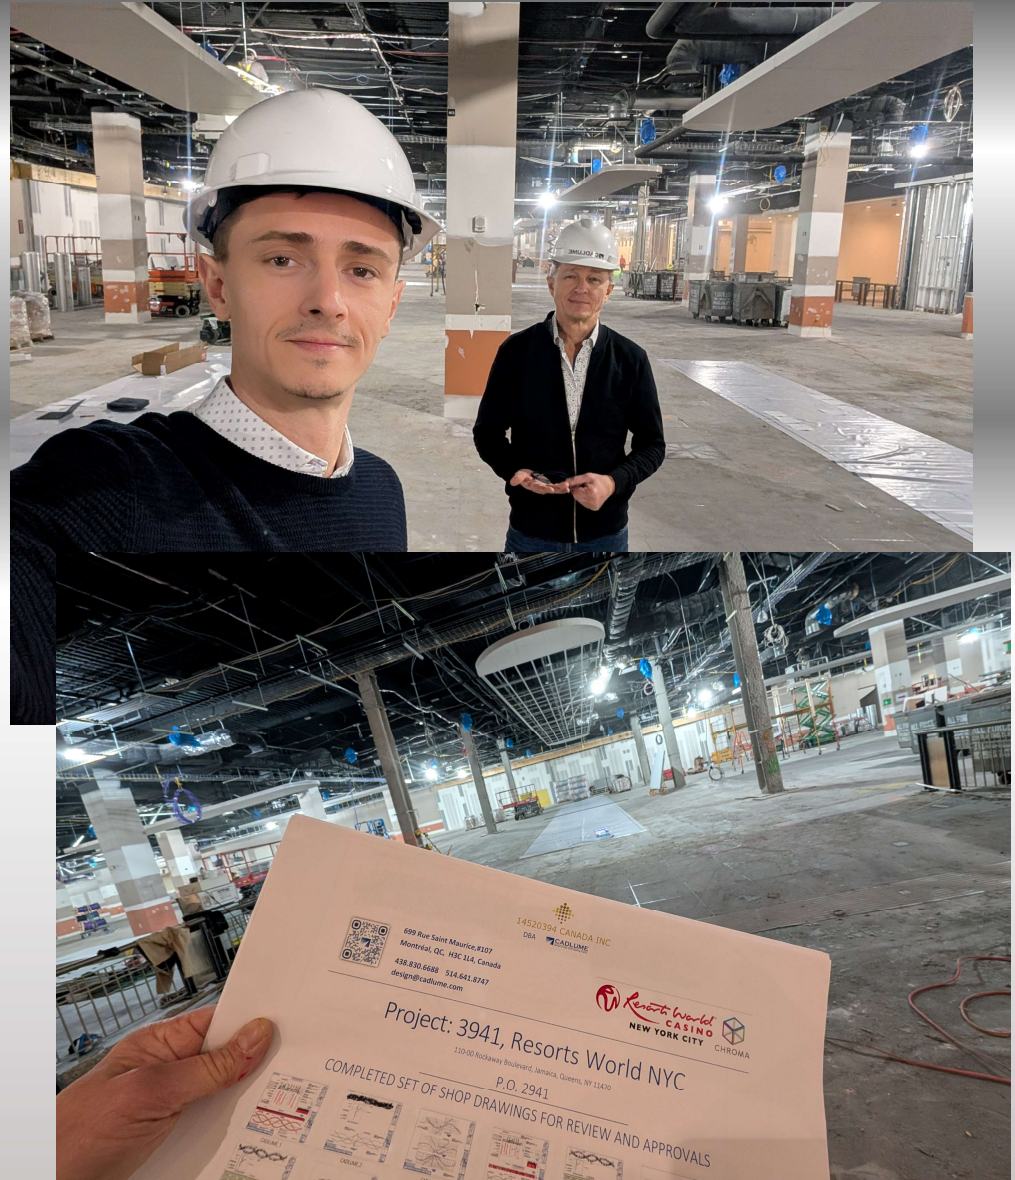

Queens, NY

A big moment for CADLUME.  
Resorts World NYC turned out beautifully, and we're  
thrilled to have played a part in lighting up this  
stunning space. Grateful for the chance to help  
shape the vibe.

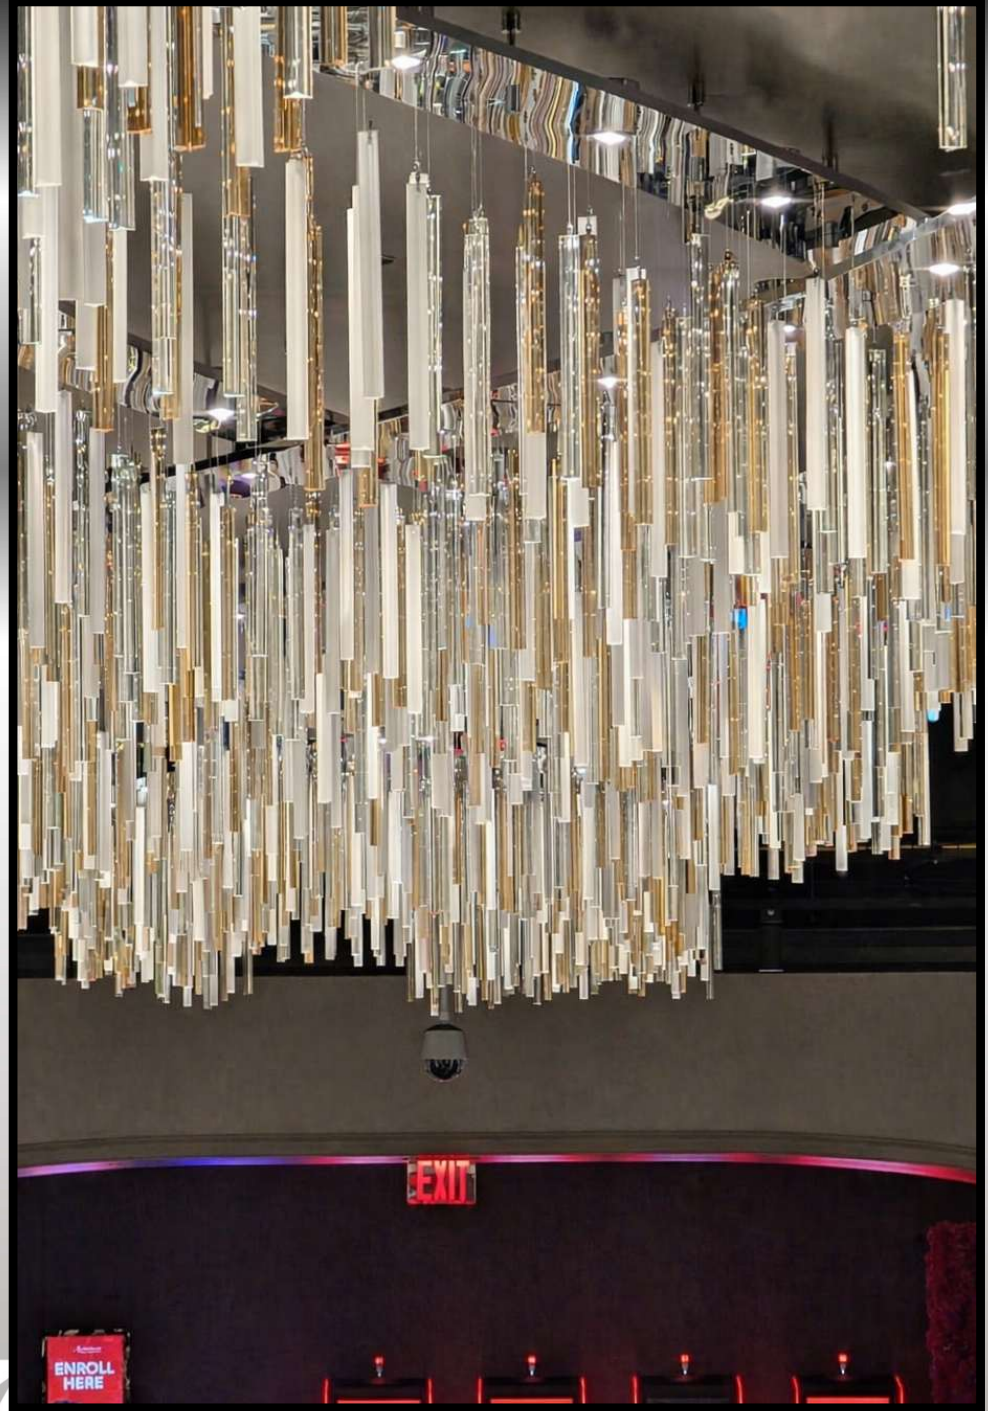

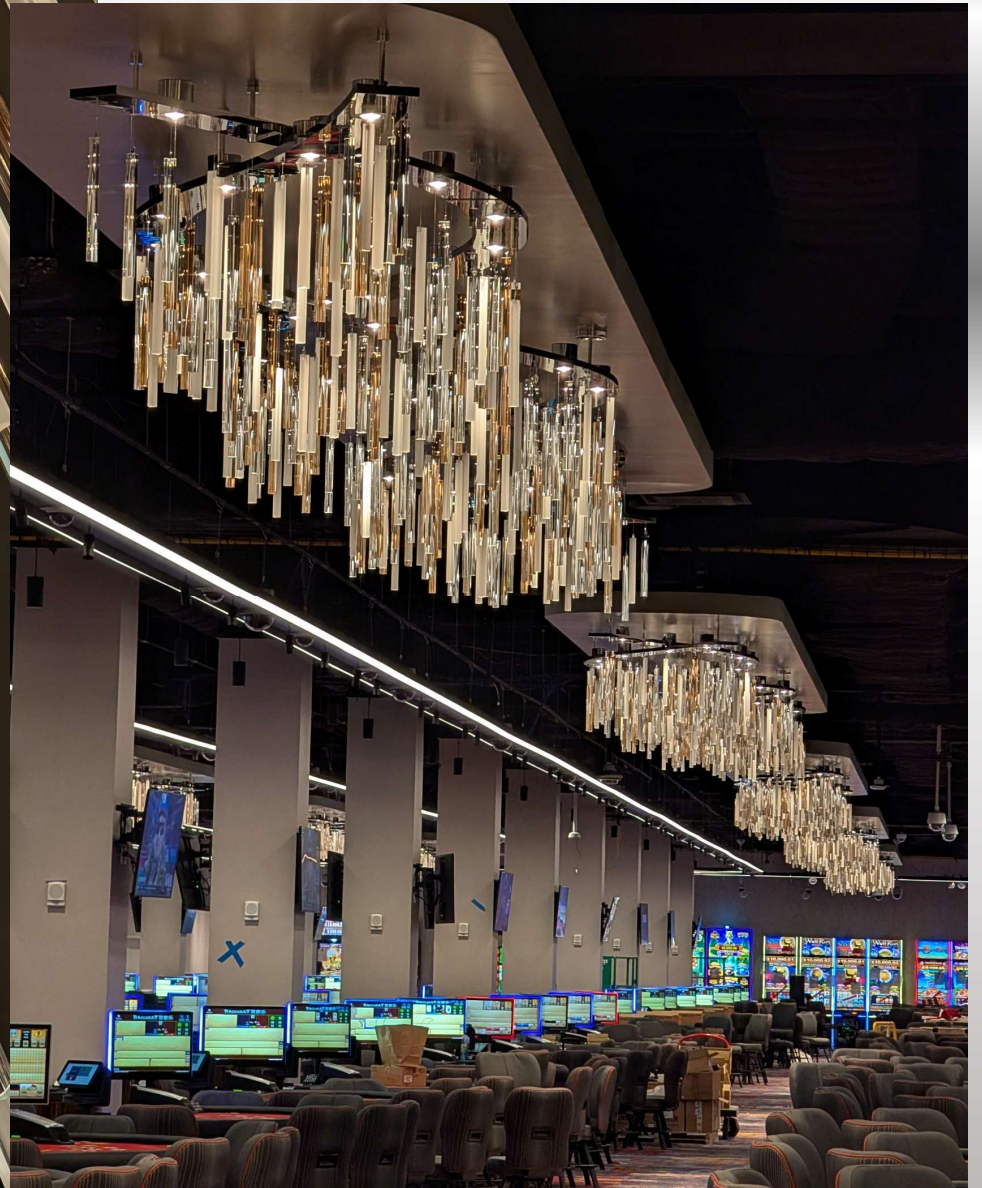

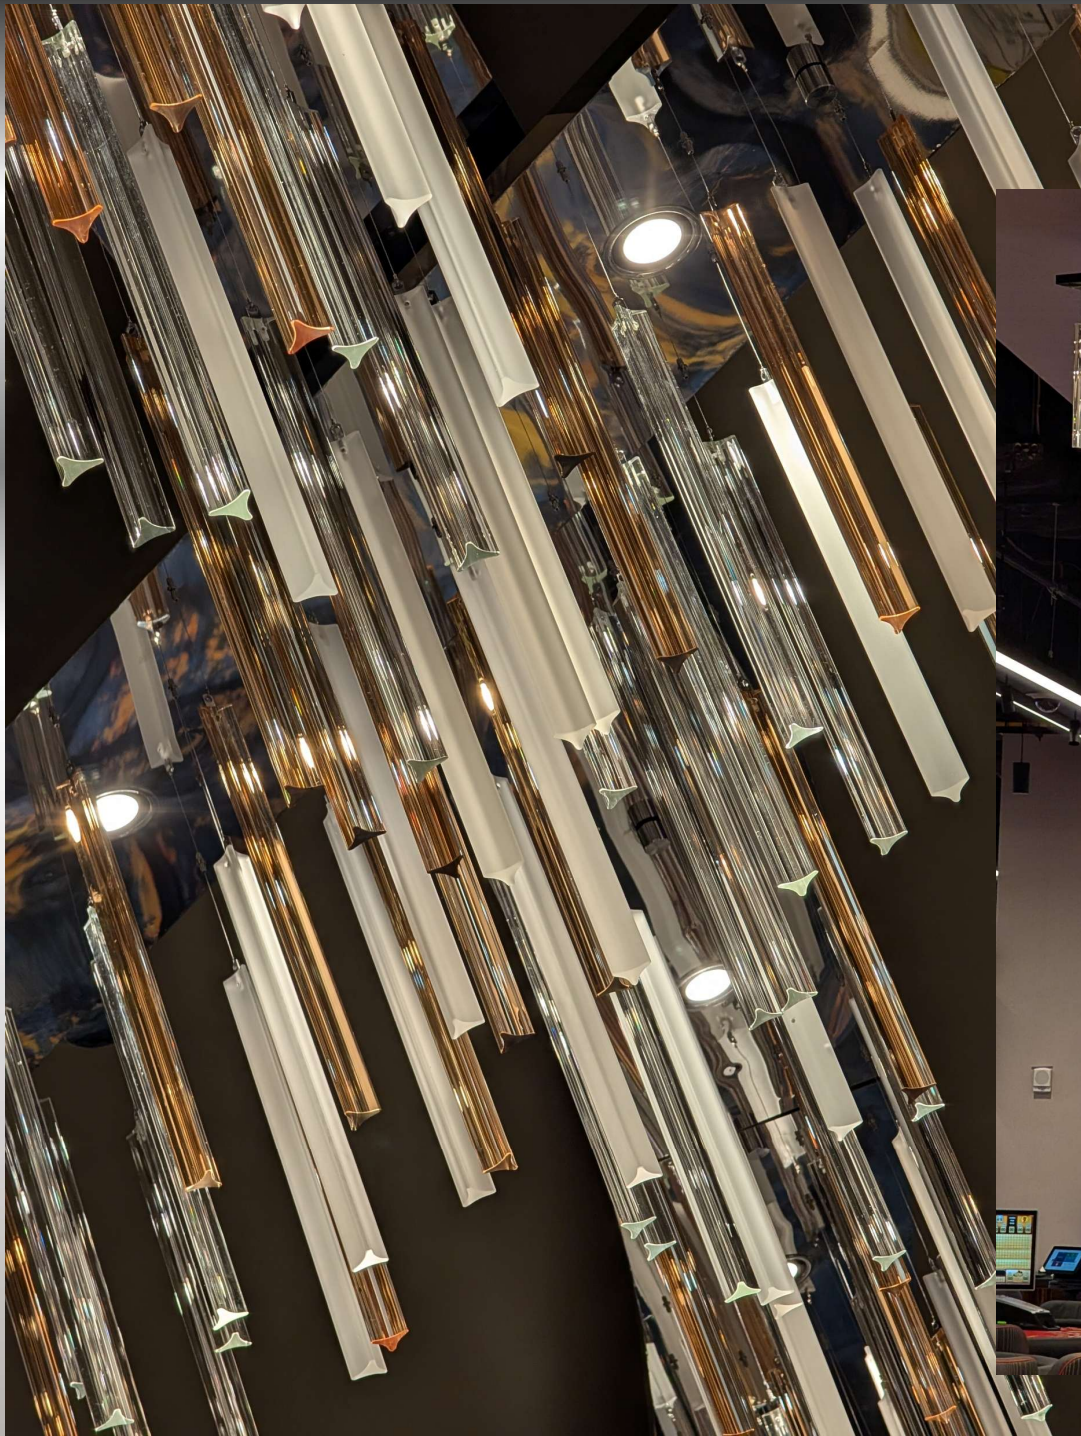

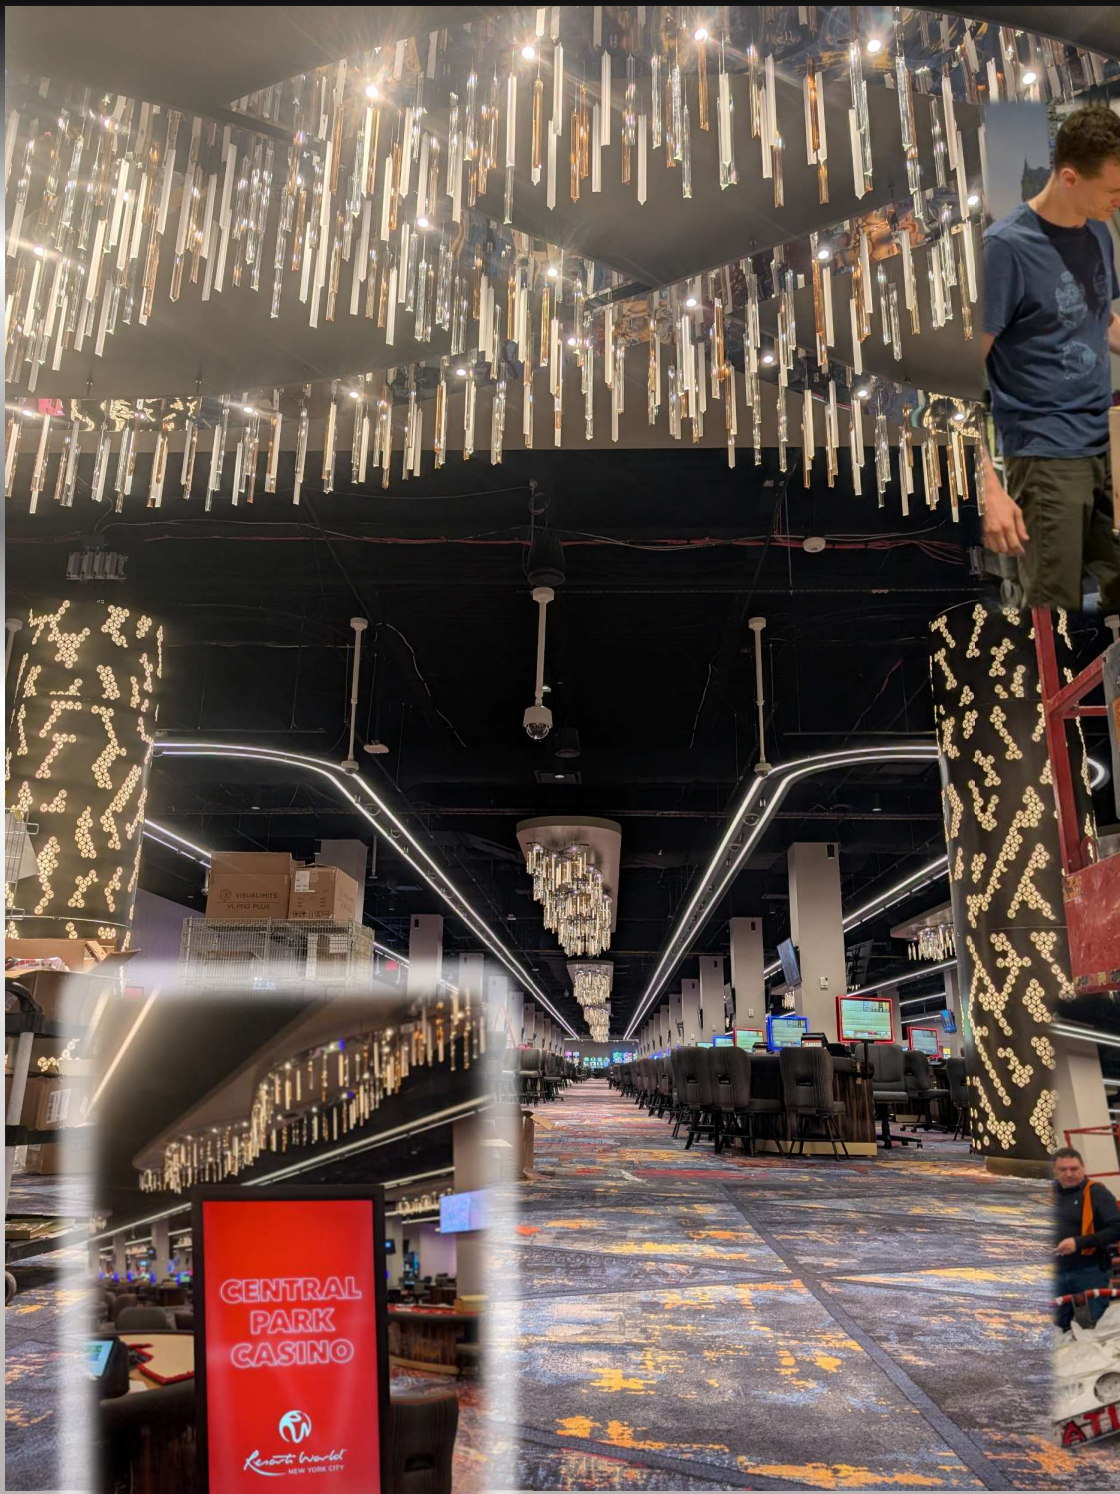

From the very beginning of construction, we worked closely with the team at HOLT CONSTRUCTION to help deliver the project on time and achieve amazing results. Resorts World NYC is the beautifully finished space it is today thanks to true collaboration, and we're grateful for the privilege of working with HOLT CONSTRUCTION on this vision.

When timelines are tight, we travel to our China facility to oversee production in person and fast-track critical steps for a quick turnaround.
